

Veneer hand gluers

Simply convenient

Simple handling, easy operation.

The KUPER hand gluer uses the KUPER glue thread as glueing medium. An ideal instrument to patch and bind splitted veneers. The KUPER KHL 2 is an ideal instrument to patch and join very buckled and thick veneer sheets. This device applies two threads in one operation with a 15 mm distance.

Advantages at a glance

- just approx. 5 min. heat-up
- exact, straight glueing
- clean break of the glue thread
- maintenance-free

Technical data

KHL 1	working with one thread
KHL 2	working with two threads
Operating voltage standard	230 V alternating current
Net weight	1.34 kg 1.59 kg
